The first of these is the fact that the  
 population of the country is increasing  
 rapidly. This is due to a number of  
 causes, the most important of which  
 are the following: (1) the increase  
 in the birth rate, (2) the decrease  
 in the death rate, and (3) the  
 immigration of people from other  
 countries. The second of these is the  
 fact that the country is becoming  
 more and more industrialized. This  
 is due to the fact that the country  
 has a large number of factories and  
 mills, and that the people are  
 becoming more and more dependent  
 upon these for their livelihood. The  
 third of these is the fact that the  
 country is becoming more and more  
 urbanized. This is due to the fact  
 that the people are moving from the  
 country to the cities in large numbers.  
 These three factors are the most  
 important causes of the changes  
 which are taking place in the country.  
 They are all contributing to the  
 growth and development of the  
 country, and to the improvement of  
 the lives of the people.

1. The first part of the paper is devoted to a general discussion of the problem of the existence of a solution of the system of equations (1) for arbitrary values of the parameters  $\alpha$  and  $\beta$ . It is shown that the system has a solution for arbitrary values of the parameters  $\alpha$  and  $\beta$  if and only if the condition  $\alpha + \beta = 1$  is satisfied.

2. In the second part of the paper the problem of the existence of a solution of the system of equations (1) for arbitrary values of the parameters  $\alpha$  and  $\beta$  is solved. It is shown that the system has a solution for arbitrary values of the parameters  $\alpha$  and  $\beta$  if and only if the condition  $\alpha + \beta = 1$  is satisfied.
